

# Creating an AdSense backfill campaign

Last Modified on 01/10/2022 6:05 pm EST

This article contains information on how to create display ad units in your Google AdSense dashboard and how to build a backfill campaign in Freestar's platform.

## Creating ad units in AdSense

To create a display ad unit, follow the instructions in this AdSense Help [article](#) to create units for each size that you are using with Freestar. AdSense Responsive tags will not work for the passback.

## Creating an AdSense backfill campaign

1. Log in to [Freestar Analytics dashboard](#).
2. Select the person icon in the top right corner of the screen.
3. Select **Self-serve Ads**.
4. Click **New Ad Campaign**. Use the following criteria to create your campaign:
  - Name – Give the campaign a name that you would want to see while searching or reporting. Suggested naming convention: Company Name - AdSense Passback
  - Type – House
  - Floor – 0.01 (Note: Google changed their policies about serving AdSense tags as third party creatives and they must be at least \$0.01 in order to serve.)
  - Sites – Select the site you would like this AdSense backfill campaign to target.
  - Leave all other settings as the default settings.
5. Click **Create Ad Campaign**.

**Name**

**Type** ☒ House ☐ Direct ☐ Network

**Start**  **End**

**Impression Limit**

**Floor (USD)**  ☐ All impressions (Sponsorship)

**Frequency Caps** ☐ Set per-user frequency cap

**Demand Partner**

**Advertiser Name**

**Display Creatives** ☐ Only once per page

**Start Options** ☒ Start as an active campaign

**Sites** **Available**  
Empty list

abcsite.com

**Targeted**  
Empty list  
  
← ← ← ←

**Targeted all locations**

6. To create a new creative, use the following criteria:

- Name – Defaults to the size of the creative
- Size – Select the size of the AdSense ad tag; we suggest you add a creative for each size available that AdSense supports: 728x90, 160x600, 300x250, 300x600, 320x50, 336x280, 468x60, 970x90, 970x250, 320x100

- Kind – Third-party
- Third-party HTML – Paste in your AdSense tag

7. Click **Add Creative to Campaign**.
8. Repeat for all other sizes for the site you selected.

## Add your Google AdSense ads.txt lines into your ads.txt file for your site

Make sure to add your AdSense ads.txt line into your ads.txt file. If you need help adding the line into your file, use our hosted ads.txt option where the lines can be added in our interface. Please email [accountmanagement@freestar.com](mailto:accountmanagement@freestar.com) if you need help implementing hosted ads.txt.

If you are already using our hosted ads.txt option, you can edit your lines by following these directions:

1. Log in to [Freestar Analytics](#).
2. In the left menu select **Site Settings > Ads.txt**.
3. If you have more than one (1) site, search for the domain name by using the "Select site" box at the top of the page.
4. Under Manage custom ads.txt lines, select the Click here link to view your additional lines.
5. Paste your AdSense line into the "Ads.txt custom lines" text field.
6. Select the Save icon in the top right.

## Important notes

The campaign may take a few hours to sync and go live on your site.

Once it is live and your ads.txt has been updated, you will be able to see your AdSense tags filling into the Freestar slots when Freestar does not have a buyer for the slot.

Your revenue for these AdSense Passback tags will appear in your AdSense dashboard

and will only appear as the \$0.01 amount that the campaign is set to in ANALYZable. Since this is not your real earnings for AdSense, we will remove the \$0.01 on our billing statements and you will be paid directly from AdSense for these impressions.
