

# Disabling Products

Last Modified on 07/20/2022 8:52 am EDT

## Disabling products via config

To disable products on certain pages or areas of the site, a `disabledProducts` object can be added when declaring the `freestar.config` object. The **default** values are `false` (**not disabled**) for all products:

The following keys represent the products:

Sticky Footer: `stickyFooter`

Video: `video`

Revolving Rail: `revolvingRail`

Pushdown: `pushdown`

Dynamic Ads: `dynamicAds`

Superflex: `superflex`

Sliding Unit: `slidingUnit`

Side Wall: `sideWall`

Page Grabber: `pageGrabber`

Google Interstitial: `googleInterstitial`

To disable a product, set the value as `true`:

```
freestar.config.disabledProducts = {  
  video: true,  
  superflex: true  
};
```

## Header Code Example Placement

```
<!-- PLACE THIS SECTION INSIDE OF YOUR HEAD TAGS -->
<!-- Below is a link to a CSS file that accounts for Cumulative Layout Shift, a new Core Web Vitals subset that Google
uses to help rank your site in search -->
<!-- The file is intended to eliminate the layout shifts that are seen when ads load into the page. If you don't want to u
se this, simply remove this file -->
<!-- To find out more about CLS, visit https://web.dev/vitals/ -->
<link rel="stylesheet" href="https://a.pub.network/core/pubfig/cls.css">
<script data-cfasync="false" type="text/javascript">
  var freestar = freestar || {};
  freestar.queue = freestar.queue || [];
  freestar.config = freestar.config || {};
  freestar.config.disabledProducts = {
    video: true,
    superflex: true
  };
  freestar.config.enabled_slots = [];
  freestar.initCallback = function () { (freestar.config.enabled_slots.length === 0) ? freestar.initCallbackCalled = false
: freestar.newAdSlots(freestar.config.enabled_slots) }
</script>
<script src="https://a.pub.network/[pub-name]/pubfig.min.js" async></scrip
```
